

Key Information Document – Spread Bet on Shares

Purpose: This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, costs, risks and rewards of this product and to help you compare it with other products.

Product: Spread Bet on a [Share](#)

Manufacturer of the Product: Capital Com (UK) Ltd is a company authorised and regulated by the Financial Conduct Authority (the “FCA”) with reference number 793714 and registered office at 2nd Floor, 4 The Broadway, Orchard Place, London, SW1H 0BF tel.: +44 (0) 208 089 7893, website: <https://capital.com/>. This Key Information Document was last updated in February 2023.

ALERT: You are about to purchase a product that is not simple and may be difficult to understand. Our Spread Betting service is not suitable for everyone.

WHAT IS THIS PRODUCT?

Type: Capital Com (UK) Ltd offers Spread Bets across a range of underlying asset classes, including, but not limited to, equity, commodities, FOREX and indices. A Spread Bet is a cash-settled, leveraged financial derivative that allows speculation on rising or falling prices. The client has no rights or obligations in respect of the underlying instruments or assets relating to the Spread Bet.

This document provides key information on Spread Bets where the underlying investment option that you choose is a share such as Tesla and Apple Inc. Shares, also known as ‘stocks’ or ‘equities’, represent units into which a company’s capital is divided for investment and ownership purposes.

A list of shares we offer Spread Bets on can be found at: <https://capital.com/spread-betting>

Objective: A Spread Bet on a share allows an investor to gain leveraged exposure to price movements in the underlying market. If you believe the price of a chosen financial instrument will go up, you open a Spread Bet position and buy the amount of GBP ‘per point’ movement in the price to meet your requirements. In other words, you ‘go long’. Similarly, if you expect the price of a chosen financial instrument to drop, you take a position of a market going down by selling, or ‘go short’. If the market moves in your favour, you make profit. Yet, if you miscalculate the direction of the market movement and the price changes contrary to your expectations, you suffer losses.

Spread Bets provide access to leverage which can magnify both profits and losses. To open a position, you are required to deposit a percentage of the total value of the position in your account. This is defined as the initial margin requirement. By way of example, if an investor purchased GBP200 per point of a Spread Bet share at a price of 400p, with a margin requirement of 20%, the initial margin amount would be GBP3,200 ($20\% \times 400 \times \text{GBP}200$). The total exposure of this trade however is GBP 80,000 (400×200), demonstrating the effect of leverage. In this example, for every penny, or ‘point’, the price of the market moves, an investor would make or lose GBP200.

An investor may be required to deposit additional funds to cover any changes in margin requirement and running losses. Failure to do so may result in the closure of the Spread Bet by Capital Com (UK) Ltd. More information with respect to margin requirements is outlined below.

Spread Bets are complex products, generally used for speculative purposes. Spread Bets are not suitable for “buy and hold” trading, therefore if an investor does not have enough time to monitor such investments on a regular basis, they should not trade in Spread Bets.

Term: Spread bets on Shares generally have no maturity date nor any minimum holding period. You decide when to open and close your position(s). We may close your position(s) without seeking your prior consent if you do not maintain sufficient margin in your account. Specifically, if the account equity (being the cash balance +/- any running profit or loss) is at or below 50% of the total margin requirement in your account, our system will automatically and systematically cancel all pending orders and close positions where there is an active underlying market for the relevant Spread Bet.

Intended retail investor: Spread Bets are intended for investors who have the necessary experience or knowledge in order to understand the risks involved in relation to leveraged products. The intended investors will understand how the prices of Spread Bets are derived, the key concepts of margin and leverage and the fact that capital loss may occur. Investors should also have appropriate financial means and the ability to bear the loss of the initial amount invested.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are unable to fulfil our obligations. We have classified this product as 7 out of 7, which is the highest risk class. This rates the potential losses from future performance at a very high level (up to 100%).

Values may fluctuate significantly in times of high volatility or market/economic uncertainty; such swings are even more significant if your positions are leveraged and

may also adversely affect your position. As a result, margin calls may be made quickly and frequently, and in the event of default, your positions may be closed out. Trade only after you have acknowledged and accepted the risks. You should carefully consider whether trading in leveraged products is appropriate for you. Our Spread Bets are not listed on any exchange, and the rates and other conditions are set by us in accordance with our [Order Execution Policy](#). The position can be closed only with us and is not transferable to any other provider. If you have multiple positions with us, your risk may be cumulative and not limited to one position.

This product does not include any protection from future market performance so you could lose some or all of your investment, including profits.

The total loss you may incur will never exceed your invested amount. The Company offers Negative Balance Protection to its Retail Clients, meaning that they will never be in a position to lose more funds than the amounts invested with the Company. Please refer to our [Terms & Conditions](#) for more details.

If we are not able to pay you what is owed, you could lose your entire investment. However, you may benefit from a consumer protection scheme (see the section "what happens if we are unable to pay you"). The indicator shown above does not consider this protection.

Be aware of currency risk. You may receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Performance Information:

The future performance of the underlying financial instrument, transaction fees, funding adjustments and currency fluctuations are the primary factors that determine the outcome of the investment. The most relevant benchmark for a Spread Bet on a share is the underlying equity itself. It is reasonable to expect near identical price movements with the exception of any additional spread added by Capital.com. It is important to consider the economic factors that can impact the future price of the underlying financial instrument as well as the effect of leverage on any returns, positive or negative.

What could affect my return positively?

A favourable change in the price of the underlying instrument from which the share Spread Bet derives its price, or a favourable change in the exchange rate between the instrument currency and the client's account currency.

What could affect my return negatively?

An unfavourable change in the price of the underlying instrument from which the share Spread Bet derives its price; a move in the currency in which the Spread Bet trades and a client's currency of their trading account and/or high transaction fees associated with the instrument. Should the Spread Bet be closed under severely adverse market conditions, an investor should be prepared to lose their entire investment.

What happens if Capital Com (UK) Limited is unable to pay out?

Capital Com (UK) Ltd segregates all retail client funds from its own money in accordance with FCA Handbook. Capital Com (UK) Ltd is also a member of the Financial Services Compensation Scheme (the "FSCS"), which provides compensation for eligible investments should Capital Com (UK) Ltd declare default. You may be entitled to compensation under the FSCS where we are unable to meet our duties and obligations arising from your claim. Whether you are able to claim depends on the type of business and your personal circumstances. Any compensation provided to you by the

FSCS shall not exceed eighty-five thousand GBP (£85,000) per person, per firm.

Full details are available on the FSCS' website: www.fscs.org.uk

WHAT ARE THE COSTS?

Before you begin to Spread Bet you should familiarise yourself with all costs for which you will be liable. These charges will reduce any net profit or increase your losses. For more information please visit our [website](#).

One-off costs	Spread % - Spread cost is variable and available per instrument on the website	Spread is the difference between the lower and the higher price of a given Spread Bet i.e. BID and ASK price. No separate commissions are paid. Our spreads are set at our absolute discretion and any changes are effective immediately.
Ongoing costs	Overnight fees % - Overnight fees cost are variable and available per instrument on the website	If you keep a position open overnight (after a certain cut-off time defined on our platform and website), an overnight premium is subtracted or credited to your account. Costs have been calculated using an example notional position size of £10,000 (calculated by price x amount per point). Negative is a charge, positive is credit. Holding period 1 day: Long position: £10,000 x -0.028% (rate from platform) x 1 = -£2.80 Short position: £10,000 x -0.016% (rate from platform) x 1 = -£1.60 Holding period 1 week: Long position: £10,000* x -0.028% (rate from platform) x 7 = -£19.60 Short position: £10,000* x -0.016% (rate from platform) x 7 = -£11.20 *Notional size will differ depending on each day's closing price.
Additional costs	% - N/A	You should be aware of the possibility that other taxes or costs may exist that are not paid through or imposed by us. It is your sole responsibility to bear these additional costs.

HOW LONG SHOULD I HOLD IT AND CAN I TAKE MONEY OUT EARLY?

Spread Bets on Shares generally have no fixed term and will expire when you choose to close your positions or in the event you do not have sufficient funds to prevent a margin call closure. You should monitor the product to determine when the appropriate time is to close your position(s), which can be done at any time during market hours.

Spread Bets are intended for short term trading, in some cases intraday and generally not suitable for long term investments. There is no recommended holding period. Capital Com (UK) Limited does not provide you with any investment advice, our trading service is execution only and we execute trades based on your instructions.

HOW CAN I COMPLAIN?

In the event you are dissatisfied about a financial product or service provided to you by Capital Com (UK) Limited, contact us to submit your complaint, providing the following information to assist us in dealing with your complaint. [Details here](#).
